3. L-5 Chandrayaan -3

**I. Read the passage given below and answer the following questions:**

In Japan, there is a beautiful technique called Kintsugi, which means "golden joinery." This art involves mending broken pottery using special liquid mixed with gold, silver, or other metals. Instead of hiding the cracks, Kintsugi highlights them, making the repaired item even more beautiful. This way, each piece of pottery tells a unique story, showing its journey and the care that went into fixing it. (Para 1)

Kintsugi teaches us that imperfections also can be special and valuable. When a cup or bowl breaks, it doesn't just become trash; it can be repaired and made even more stunning than before. The cracks represent the history of the object, reminding us that everything has its own story, including ourselves. It encourages people to accept their flaws and see beauty in them. (Para 2)

This technique has become popular around the world, not just for pottery but also as a way of thinking. People are inspired to appreciate things that are broken or worn out instead of throwing them away. Kintsugi shows us that repair and renewal can create something truly remarkable, reminding us that every mistake or crack can lead to something new and beautiful. (Para 3)
