Q1. Read the passage given below carefully and answer the following questions:

Butterflies are small flying insects known for their colourful wings. There are different types of butterflies such as the monarch butterflies, swallowtail butterflies and painted lady butterflies. Butterflies go through a process which changes their body structure. When they are born, they are small, crawling creatures called caterpillars. As they grow, they spin a cocoon around themselves and change into a butterfly. (Para 1)

Butterflies are important to the environment because they help pollinate flowers and plants. They drink nectar from flowers and spread pollen as they fly from one flower to another. (Para 2)

1. What are butterflies?
 - a. They are flying insects.
 - b. They are flying animals.
2. When they are born, they are small crawling creatures called _____.
 - a. earthworms
 - b. caterpillars
3. What do butterflies drink from flowers?
