

**DELHI PUBLIC SCHOOL, NERUL, NAVI MUMBAI**  
**SCIENCE PRACTICE ASSIGNMENT-2**  
**SESSION 2024-25**  
**CLASS III**  
**Date of Assignment 2- (18-07-24)**  
**Portion – Ch 3 : The World of Animals – Feeding Habits**  
**(To be submitted on 12-07-24)**

---

**1. Fill in the blanks.**

1. Butterflies suck \_\_\_\_\_ from the flowers.
2. Eating food by repeatedly taking small bites is called \_\_\_\_\_.
3. \_\_\_\_\_ have strong and flat grinding teeth to chew the food properly.

**2. Read the following and answer the questions.**

Food chain is the series of living beings eating and being eaten. Herbivores eat plants while carnivores eat herbivores. All the food chains begin with plants. Hence, all animals depend directly or indirectly on plants for their food requirements.

1. What are herbivores?
2. What would happen if all the plants die?

**3. Give any two examples of -**

1. Aquatic carnivores.
2. Animals that swallow their food whole.
3. Animals that chew the cud.

**4. How do the following animals breathe?**

1. Frogs.
2. Mosquitoes.

**5. What is response to stimuli? Give one example.**

**6. How animals are dependent on plants?**
